

JOB DESCRIPTION – SOFTWARE ENGINEER (.Net Fullstack Developer)

About INTO:

INTO University Partnerships is an independent organization focused on expanding higher education opportunities for students worldwide. Key to our mission is to help universities create a rich and globally diverse campus environment for teaching and learning, and to extend the global reach and impact of the university's research and engagement. INTO has a rapidly growing network of university-based study centres. We offer international students the opportunity to fulfil their educational goals and achieve academic success at a leading university in the UK, USA and China. Combining the resources of the best universities in the world with major independent investment, INTO Centres deliver a world-class educational and cultural experience for international students, with fast, effective, and assured progression to university degree courses, creating an unforgettable student experience.
